

BC Public Sector Cloud Mapping & Transformation Workshop

Propel your Public Sector organization and processes forward to drive efficiency and productivity throughout your workforce with Steeves and Associates.

BC Privacy Act & Cloud Technologies

Since 2004, British Columbia's Freedom of Information and Protection of Privacy Act (FOIPPA) has legislated parameters for how the information of BC residents should be treated, used and stored.

Recently, the British Columbia's OCIO (Office of the Chief Information Officer) updated the Privacy Impact Assessment (PIA) to reflect the state of today's technology environment. The update to the PIA enables BC's Public Sector to move forward with various cloud technologies, including Microsoft Cloud Technologies, to propel organizational productivity and efficiency.

Senior Public Sector Cloud Leaders & Experts

A Microsoft Partner since 1993 and a long-standing member & partner of BCNet and MISA BC, Steeves and Associates works with many BC Public Sector organizations to help align, assess, map and deploy Cloud technologies and infrastructure.

Propel your BC Public Sector organization and processes forward to drive efficiency and productivity throughout your workforce with a **BC Public Sector Cloud Mapping & Transformation Workshop** from Steeves and Associates.

Public Sector Cloud Technology & Leadership

As the 1st Microsoft Cloud Partner in Canada, Steeves and Associates has been revered for Cloud leadership in BC's Public Sector and knows cloud technology better than anyone. We have been working with BC Public Sector institutions to move organizational productivity, efficiency and technology forward since 1992.

Since the launch of Microsoft Cloud Services in Canada in 2009, Steeves and Associates has been working with large BC Public Sector institutions to construct use cases, to move workloads and to propel organizational productivity forward.

Steeves and Associates continues to work with both clients and vendors to lead and to drive technologies and technology use cases forward, just as Steeves and Associates has done to encourage the deployment of Microsoft Data Centres in Canada, which were opened in Toronto and Quebec City in 2016.

Join Steeves and Associates for a **BC Public Sector Cloud Mapping & Transformation Workshop** to explore, assess, map and resolve how moving your unique workloads to the cloud will impact and benefit your organization for years to come.

Public Sector Cloud Mapping & Transformation Workshop

With Steeves and Associates' **BC Public Sector Cloud Mapping & Transformation Workshop** you will receive:

1. A analysis and alignment, in adherence with the BC Privacy Act & PIA guidelines, to where Cloud technologies, infrastructure and services can most improve your organization.
2. A defined business requirement and technical requirement document for moving to the cloud.
3. A recommendation and optional Proof of Concept (POC) for moving specific workloads (e.g. *Microsoft 365 Exchange*) to the Cloud.
4. A dedicated senior Cloud expert and resource to confidently move forward to the Cloud.

Working with Steeves and Associates on your cloud mapping and transformation will provide you with transferrable knowledge to help your internal team become more comfortable and confident with the Cloud and cloud technologies.
